SAE TO-4 Fluid

Recommended for CAT® TO-2, CAT® TO-4
Allison® C-3, Allison® C-4 OEM Requirements

REV: 06.06.2024

DESCRIPTION

Xtreme™ Transoil™ SAE TO-4 Fluids are premium quality transmission, final drive, and hydraulic oils formulated to meet the specific frictional characteristics of Caterpillar and Allison Powershift Transmissions. These fluids are similar to Universal Transmission Hydraulic Fluids used in farm tractors and construction machinery but have higher frictional characteristics designed specifically for Caterpillar and Allison applications.

Xtreme™ Transoil™ SAE TO-4M is a multi-season product designed for use in varying outdoor temperatures. It is an SAE 40 with a high viscosity index.

BENEFITS

- ❑ High Viscosity Index (VI) base oils improve oxidation resistance
- ❑ Excellent thermal stability improves high temperature operation
- ❑ Extreme pressure additives prevent gear scuffing and scoring
- ❑ Prevents formation of rust and sludge throughout the system
- ❑ Prevents corrosion of copper and brass
- ❑ Excellent hydrolytic stability
- ❑ Excellent resistance to foaming
- ❑ Specific frictional control per OEM specifications

APPLICATION

- Caterpillar TO-4 applications in logging and construction equipment
- Allison Powershift Transmissions where C-4 Fluids are recommended.
- Not recommended for low chatter clutch and brakes typical in farm tractors
